EDUCATION

University of Georgia

Bachelor of Science in Computer Science

Emphasis in Software Design

Certificate of Applied Data Science

Athens, GA

May 2026

Current cumulative GPA: 3.92/4.0

December 2025

SKILLS

Programming Languages: Java, C, C++, SQL, HTML, CSS, Python, XML, JavaScript, TypeScript

Frameworks & Libraries: Spring Boot, React, THREE.js, Scikit-Learn, Matplotlib, Pandas, NumPy

Tools & Technology: Unix, Android Studio, MySQL, Terraform, Git, GitHub, Postman, Figma, MATLAB, JMP

CERTIFICATIONS

- AWS Certified Cloud Practitioner

January 2026

WORK EXPERIENCE

AI Intern

OneData Software Solutions

May 2026 - Current

Remote

- Architected & deployed AWS Bedrock chatbot using Terraform IaC, OpenSearch Serverless, and an S3 bucket to help schedule hospital staff shifts, make predictions, & generate operational insights with compliance guidance.

Undergraduate Teaching Assistant

University of Georgia

January 2025 - May 2025

Athens, GA

- Graded 50+ weekly programming assignments in C on inter-process communication, providing detailed feedback to each student regarding debugging code to help students improve their understanding and address errors with clarity.

PROJECT EXPERIENCE

Heart Disease Data Analysis

November 2025

- Developed a scikit-learn logistic regression model to predict heart disease from a standardized & encoded dataset.
- Analyzed each attribute's coefficients & plotted probability curves for each to compare the impact on predicted risk.
- Evaluated performance using the confusion matrix & classification report's accuracy, precision, & recall values.

Item Trading Android App

October 2025

- Built an Android app in Android Studio using Java & Google Firebase database to allow users to post items for sale.
- Developed user authentication, fragment navigation, and recycler view to list multiple items on a page seamlessly.
- Implemented the create, update, & delete functionalities for an item & created orientation compatible layouts.

Cinema e-Booking Web Application

Spring 2025

- Led a team of developers to develop a full-stack movie ticket booking website using Spring Boot, Java, & React.
- Built the relational database architecture & implemented secure role-based authentication using JSON Web Token.
- Implemented an AES-encrypted credit card storage, user profile management, & other core backend functionalities.

JavaFX

April 2023

- Developed JavaFX GUI application to receive user input on a country name to display the corresponding output.
- Integrated data from multiple RESTful JSON APIs to display the sunrise and sunset times of the country's capital.
- Engineered a user-friendly, intuitive interface for seamless user interaction and efficient data display.

RELEVANT CLASSWORK

Web Programming, Data Science 1, Mobile Software Engineering, Software Engineering, Cybersecurity, Database Management, Computer Networks, Computer Architecture Organization, Systems Programming, Algorithms, Data Structures, Software Development, Statistical Methods, Computer Graphics

DISTINCTIONS

Presidential Scholar

Dean's List

Spring 2023, Fall 2023, Fall 2025, Spring 2026

Spring 2024, Spring 2025
